

V K HARISH BODAPATI

DEVOPS ENGINEER | AWS CLOUD INFRASTRUCTURE | KUBERNETES | TERRAFORM | CI/CD | DEVSECOPS

Hyderabad, India | +91 8985771234 | vkharishbodapati@gmail.com | linkedin.com/in/vkharishbdevops | github.com/vkharishb

PROFESSIONAL SUMMARY

DevOps Engineer with 8+ years of overall IT experience, including 6+ years focused on DevOps and cloud engineering, with earlier experience in production/support environments. Hands-on experience designing and operating AWS cloud infrastructure, Kubernetes/EKS workloads, Terraform-based Infrastructure as Code, CI/CD automation, DevSecOps, observability, production releases, incident response, and RCA. Experienced with AWS, EKS, ECS, Terraform, Docker, Kubernetes, Helm, Jenkins, GitHub Actions, Grafana, Prometheus, CloudWatch, ELK, IAM, Python, Git, and GitHub. At Accenture, contributed to an approximately 25% reduction in deployment time while standardizing CI/CD delivery practices.

TECHNICAL SKILLS

Cloud: AWS (EC2, EKS, ECS, VPC, IAM, S3, RDS, Auto Scaling, Lambda, Secrets Manager, Systems Manager Parameter Store); Azure – basic exposure

Infrastructure as Code: Terraform, reusable modules, remote state, workspaces

Containers & Orchestration: Docker, Kubernetes, Amazon EKS, Amazon ECS, Helm

CI/CD: Jenkins, GitHub Actions, GitLab CI/CD

Monitoring & Logging: Grafana, Prometheus, AWS CloudWatch, ELK Stack

DevSecOps & Security: SonarQube, Black Duck, IAM, RBAC, secrets management, OWASP-aligned practices

Scripting & OS: Python, YAML, Groovy, Linux

Artifact & Source Control: Nexus Repository, Git, GitHub

Practices: DevOps, DevSecOps, CI/CD, Release Management, Incident Management, RCA, High Availability, Agile

PROFESSIONAL EXPERIENCE

DevOps Engineer | MANIERE SOFTWARE & TECHNOLOGIES | Bengaluru

Apr 2024 – Present

- Design, provision, and maintain AWS cloud infrastructure using Terraform and Infrastructure as Code across 3 environments, improving infrastructure consistency and reducing manual provisioning effort.
- Deploy and manage containerized applications on Kubernetes and Amazon EKS using Docker and Helm, supporting workloads across multiple environments.
- Build and maintain CI/CD pipelines using Jenkins and GitHub Actions for automated build, testing, artifact publishing, approvals, and deployment workflows across 10+ applications.
- Manage Git and GitHub workflows to support source control, collaboration, and application delivery processes.
- Implement secure AWS networking using VPCs, public/private subnets, route tables, NAT gateways, security groups, Route 53, and private connectivity.
- Manage IAM roles, policies, and application secrets using least-privilege principles, AWS Secrets Manager, and Systems Manager Parameter Store.
- Apply OWASP-aligned security practices within application delivery and deployment workflows.
- Configure Kubernetes autoscaling and resilient workloads using Horizontal Pod Autoscaler (HPA) and production-oriented deployment strategies.
- Build operational dashboards and monitoring using Grafana, Prometheus, AWS CloudWatch, and ELK to support production visibility, troubleshooting, and incident response.
- Use ServiceNow for production incident, change, and release management workflows.
- Develop Python automation for deployment validation, smoke checks, routine operations, and infrastructure administration.
- Participate in production releases, incident management, troubleshooting, root cause analysis, backup, recovery, and reliability improvement activities.

DevOps Engineer / Senior Analyst | Accenture Solutions Pvt. Ltd. | Hyderabad

Sep 2022 – Feb 2024

- Engineered CI/CD pipelines using GitHub Actions and Jenkins, reducing deployment time by approximately 25% and standardizing delivery practices across teams.
- Built reusable Terraform modules for multi-environment infrastructure automation, improving consistency and reducing environment setup effort.
- Designed and operated production-grade Kubernetes workloads on AWS EKS for 10+ microservices, supporting autoscaling and high availability.
- Managed application deployment workflows using Argo CD to support controlled and repeatable Kubernetes deployments.
- Integrated SonarQube and Black Duck into CI/CD pipelines to strengthen code quality, security, and open-source compliance controls.

- Managed Git and GitHub workflows alongside CI/CD processes for source control, collaboration, and release management.
- Implemented operational dashboards and monitoring using Grafana, Prometheus, AWS CloudWatch, and ELK for production visibility and troubleshooting.
- Used ServiceNow for production incident, change, and release management workflows.
- Supported concurrent production releases, environment readiness, deployment approvals, incident response, root cause analysis, and resilience improvements.
- Collaborated with development, QA, security, and operations teams to improve release reliability and delivery efficiency.

Software Engineer | Lince Soft Solutions Pvt. Ltd. | Hyderabad

Jun 2018 – Sep 2022

- Progressed from production/support responsibilities into DevOps and cloud automation, gaining hands-on experience with AWS, Docker, Jenkins, Git, and GitHub.
- Built and maintained Jenkins pipelines for automated build, testing, artifact publishing, and deployment workflows.
- Containerized applications using Docker and supported AWS infrastructure including EC2, S3, IAM, VPC, and related services.
- Automated artifact publishing and versioning using Nexus and improved deployment consistency through CI/CD standardization.
- Applied IAM least-privilege controls, Git-based workflows, deployment validation, and automated rollback practices.
- Participated in production support, release coordination, troubleshooting, incident resolution, and RCA.

SELECTED PERSONAL PROJECTS

CODAP — Centralized Observability & Deployment Analytics Platform: Designed a platform combining Kubernetes observability, deployment analytics, DevSecOps, and operational visibility using AWS/EKS, Terraform, Prometheus, Grafana, CI/CD, Argo CD, DORA metrics, IAM, IRSA, KMS, SonarQube, OWASP Dependency-Check, Trivy, and Python/FastAPI.

EKS Production Platform — AWS, Terraform & Kubernetes: Designed and automated a production-oriented AWS EKS platform using Terraform. Implemented Docker, Helm, Kubernetes RBAC, NetworkPolicies, HPA, AWS Load Balancer Controller, GitHub Actions, IAM, IRSA, and remote Terraform state across multiple environments.

Secure CI/CD DevSecOps Pipeline — Jenkins & GitHub Actions: Designed a CI/CD pipeline integrating automated build, testing, security validation, artifact management, and deployment workflows using Jenkins, GitHub Actions, SonarQube, OWASP Dependency-Check, Trivy, Nexus, and Docker.

Reusable Terraform AWS Infrastructure Modules: Developed reusable Terraform modules for VPC, EKS, IAM, EC2, and S3, applying Infrastructure as Code practices for standardized, maintainable, and repeatable multi-environment AWS provisioning.

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02)
- Databricks Academy Accreditation – Generative AI Fundamentals

EDUCATION

Bachelor of Technology (B.Tech) | Swarnandhra Institute of Engineering & Technology | JNT University, Kakinada, India | 2015
